### PROFESSIONAL EXPERIENCE

#### Robert Half Full Stack Engineer II

Nov 2020 - Present

- Contributed to the development and maintenance of 20 high-traffic global websites, collaborated among 5+ different teams, skillfully managed high-priority tickets alongside concurrent assignments, and consistently delivered with quality and efficiency in a rapid agile environment.
- Took a leading role in a pivotal Component Library project, helped deliver 100+ high-performance web components while working closely with the design team, and took ownership of its release process and distribution to multiple development teams.
- Served as direct support to the Senior Solutions Architect and swiftly expedited significant challenges, including troubleshooting, handling urgent issues, triaging reported bugs, and discussing ideas.
- Mentored and guided fellow team members, conducted multiple code reviews simultaneously, and regularly offered support wherever needed.

*Javascript • React • Stencil • Storybook • AEM • Drupal • PHP*

#### Boonoob Full Stack Engineer

Jun - Nov 2020

- Designed and implemented multiple RESTful web API endpoints in Node to proficiently manage a variety of HTTP requests asynchronously.
- Simultaneously collaborated with the production team to conceptualize and execute user-friendly features, resulting in a significant boost in user engagement and acquisition.

*Javascript • Node • Express • Stripe • MongoDB • Postman*

#### Fanmire Full Stack Engineer

Jan - May 2020

- Engineered a website showcasing a social media aggregation system, collecting user content from Twitter, Facebook, and Instagram, and presenting it in a clean and unified newsfeed.
- Took charge of the design and development of the user interface, server, and database collection.

*Javascript • Node • Vue • Express • Axios • MongoDB • Postman*

#### Thing.tv Frontend Engineer Intern

May - Aug 2019

- Collaborated with the frontend team to craft an elegant and user-centric interface and delivered code for the site, while also actively contributing to enhancing the backend website's performance in close coordination with the entire development team.

*Javascript • HTML/CSS • Heroku • UX/UI Design*

### EDUCATION

#### Computer Science, B.S.

May 2020

University of San Francisco  
San Francisco, CA

## NOTABLE PROJECTS

### Underground Universal Artist Dashboard

Oct - Feb 2023

Designed and built a comprehensive and highly functional web application for underground musical artists, enabling them to create user-authenticated accounts, manage their profiles, discover, collaborate, and share with fellow artists on a visually captivating and user-friendly platform.

*Typescript • Next • Tailwind • GraphQL • Postgres • Apollo • Prisma • Supabase • Auth0 • Figma*

### Underground Universal Landing Page

Sep - Oct 2022

Developed the landing page for Underground Universal, a record label dedicated to providing artists complete royalty control while offering a range of services, showcasing a website that is concise and engaging while displaying the record label's dignified values.

*Typescript • Next • Tailwind • Figma • Webflow*

### Whac-a-NFT

Jul 2022

Seamlessly integrated NFTs into a decentralized web application featuring a game reminiscent of Whac-a-Mole, allowing users to showcase their digital assets in a fun and engaging way.

*Typescript • Next • Tailwind • Moralis Solana API*

### Web3 Discovery

Apr - May 2022

Developed a Web3 discovery application facilitating effortless exploration of 50+ blockchain companies and platforms, offering dynamic filtering, search, and detailed insights into our database.

*Typescript • Next • Tailwind • Prisma • Postgres • Heroku*

### Diffusion Board Creator

May - Aug 2021

Created a web application enabling users to create and personalize their preferred online content, offering the convenience of utilizing a Chrome extension or manually adding URLs to organize blog posts, tweets, YouTube videos, and more into custom boards, engaging seamless sharing with friends.

*Javascript • React • Styled-Components • Firebase • Google Cloud • Figma*

### Twitter React App

Jul - Sep 2020

Engineered a replica of the Twitter web app using React, featuring essential post, like, and retweet functionalities within a visually identical user interface optimized for all devices.

*Javascript • React • JSX • Bootstrap*

## TECHNICAL SKILLS

*Javascript • Typescript • React • Next • Vue • Tailwind • Bootstrap • Stencil • Storybook • HTML/CSS • Styled-Components • JSX • Node • Express • Axios • Git • REST • GraphQL • Postgres • Apollo • Postman • Auth0 • Prisma • Supabase • Heroku • Firebase • MongoDB • Google Cloud • Google Chrome Extension • Webflow • AEM • Drupal • PHP • Java • Python • Figma • Adobe XD • Solana*
