Full Stack Engineer with 6+ years of experience specializing in high-performance Frontend. Expert in building scalable, production-ready UIs for enterprise products using TypeScript, Stencil.js, and AWS, while integrating AI-powered tools (GitHub Copilot, Claude) into daily development workflows.

EXPERIENCE

Full Stack Engineer III • Robert Half

11/2020 - Present

- Engineering an enterprise-scale component library of 140+ high-performance, customer-facing web components with 300+ variants — integrating complex third-party APIs and driving cross-team implementation, standardizing UI across 20+ global production sites.
- Leading the migration of core codebases from GitLab to GitHub, while pioneering the company's first Jenkins to GitHub Actions CI/CD pipeline, establishing the blueprint for enterprise-wide adoption.
- Architecting and deploying secure, serverless AWS APIs using CDK, Lambda, API Gateway, and S3, serving as the team's primary resource for cloud infrastructure.
- Improving website performance by optimizing bundle sizes, CSS delivery, critical rendering path, and JavaScript execution, achieving measurable gains in Core Web Vitals and Lighthouse scores.
- Reducing production bugs by leading the implementation of Chromatic automated visual regression testing, improving confidence in UI changes across 140+ components.

Full Stack Engineer • Buzzable

06/2020 - 11/2020

- Spearheaded the development of core product features, resulting in a 20% boost in user acquisition through cross-functional collaboration with product and business teams.
- Designed foundational REST API endpoints, establishing the core backend infrastructure during the company's early stages to support initial user scaling.

Full Stack Engineer • Fanmire

01/2020 - 05/2020

- Architected a unified newsfeed application that aggregates real-time data from Twitter, Facebook, and Instagram APIs, providing users with a centralized view across all major social platforms.

Frontend Engineer Intern • Thinq.tv

05/2019 - 08/2019

- Developed key front-page features to drive user engagement and optimized website performance through code refinements, contributing to a more responsive user experience.

EDUCATION

Computer Science, B.S.

05/2020

University of San Francisco, San Francisco, CA

TECHNICAL SKILLS

TypeScript • JavaScript • Stencil.js • Next.js • React • Node.js • AWS (CDK, Lambda, API Gateway, S3, IAM)
• REST API • Postman • Git • GitHub Actions • Storybook • Chromatic • Tailwind CSS • HTML5 • CSS3
