Full Stack Engineer (5+ years) specializing in high-performance Frontend. Expert in building scalable, production-ready UIs for enterprise products using TypeScript, Next.js, and AWS, while leveraging AI-assisted development daily to accelerate delivery and optimize code quality.

EXPERIENCE

Full Stack Engineer III • Robert Half

11/2020 - Present

- Engineering an enterprise-scale component library containing 100+ high-performance, customer-facing web components, integrating complex third-party APIs, with 300+ variants to standardize UI across multiple production apps and accelerate development cycles.
- Architecting and deploying secure, serverless AWS APIs using CDK, Lambda, API Gateway, and S3 to expose component data, serving as the team's primary resource for cloud infrastructure.
- Leading the migration of core codebases from GitLab to GitHub while automating end-to-end build/release lifecycles, significantly reducing manual overhead and streamlining workflows.
- Reducing website load times by optimizing the critical rendering path, bundle sizes, and CSS delivery, significantly improving Core Web Vitals and Lighthouse scores.
- Minimizing production bugs and resolving bottlenecks by leading the implementation of automated UI visual testing and processes to improve development and testing cycles.

Full Stack Engineer • Buzzable

06/2020 - 11/2020

- Spearheaded the development of core product features using React, resulting in a 20% boost in user acquisition through cross-functional collaboration with product and business teams.
- Designed foundational REST API endpoints using Node.js, establishing the core backend infrastructure during the company's early stages to support initial user scaling.

Full Stack Engineer • Fanmire

01/2020 - 05/2020

- Architected a unified newsfeed application aggregating real-time data from Twitter, Facebook, and Instagram APIs to meet core business reporting requirements.

Frontend Engineer Intern • Thinq.tv

05/2019 - 08/2019

- Developed key front-page features to drive user engagement and optimized website performance through code refinements, contributing to a more responsive user experience.

EDUCATION

Computer Science, B.S.

05/2020

University of San Francisco, San Francisco, CA

TECHNICAL SKILLS

TypeScript • JavaScript • Next.js • React • AWS (CDK, Lambda, API Gateway, S3, IAM) • GraphQL • REST API • PostgreSQL • Stencil.js • Tailwind CSS • Storybook • Chromatic • Git • Postman • HTML5 • CSS3
